Abdulqader Alshawea

Full Stack Developer

Al Khobar, Eastern, Saudi Arabia | abdulqadergobs@gmail.com | 00966502276010
| LinkedIn: linkedin.com/in/abdulqaderalshawea-182800250 | GitHub: github.com/Nested101
Portfolio: nested101.github.io/abdulqader_cv

PROFESSIONAL SUMMARY

Dynamic and fast-learning software developer with experience in web, desktop, and mobile application development, complemented by a background in interior design. Proficient in modern programming languages, adaptable to high-pressure environments, and committed to delivering innovative and efficient solutions to complex software challenges.

WORK EXPERIENCE

Desktop Applications Developer *2018 - 2019*

- Developed Water System, University System, and Stock System
- Created reports using Crystal Reports
- Implemented SQL Server database solutions

Tech Stack: Crystal Reports, SQL Server

Mobile Applications Developer *2019 - 2020*

- Developed WhatsApp clone with Firebase
- Created Twitter clone with AppWrite
- Built MAUI Water System with API backend

Tech Stack: Flutter, Firebase, AppWrite, MAUI, RDLC Reports

Web Applications Developer *2020 - 2022*

- Developed Angular Water System with .NET API backend
- Created Invoice System with PDF reports
- Built E-commerce and Realtime Chat systems

Tech Stack: Angular, .NET API, PDF Reports

Outsourcing Developer — Datatrans Company *2022 - 2024*

- Worked on ASP.NET Core MVC projects
- Improved Nawras System, ANHAR System, Saned Service System
- Implemented jQuery/JS solutions

Tech Stack: ASP.NET Core MVC, jQuery, JavaScript

Microservices Developer *2022 - 2024*

- Developed .NET Microservices with API Gateway
- Implemented Docker, RabbitMQ, and gRPC solutions
- Worked on CRM, Attendance, Compliance, Talent Acquisition, Loss Intelligence, Performance Management, and Saned Services modules

Tech Stack: .NET, Docker, gRPC, RabbitMQ, API Gateway, DevOps

Desktop Applications Developer (Freelance) *2024 - 2025*

- Developed Water Application for a neighborhood
- Created University Application
- Built Stock/ERP System

Tech Stack: SQL Server, Azure

Full Stack Developer — Shirkat Al-Inara Al-Hurra *2024 - 2025*

Riyadh, Saudi Arabia

- Delivered full stack features across React and Vue.js frontends with a .NET API backend
- Designed and optimized SQL Server data layers

Tech Stack: React, Vue.js, .NET API, SQL Server

Full Stack Developer — Freelight *2025*
Riyadh, Saudi Arabia

- Built full stack modules with .NET, SqlSugar ORM, and Vue.js
- Developed reporting features for business operations

Tech Stack: .NET, SQL Server, SqlSugar, Vue.js, Reporting

Full Stack Developer — Maham *2025*
Riyadh, Saudi Arabia

- Built full stack modules with .NET, SqlSugar ORM, and Vue.js
- Developed reporting features for business operations

Tech Stack: .NET, SQL Server, SqlSugar, Vue.js, Reporting

Full Stack Developer — Maham AI *2025*
Riyadh, Saudi Arabia

- Built full stack features using .NET and Next.js with a PostgreSQL data layer

Tech Stack: .NET, Next.js, React, PostgreSQL

Full Stack Developer — Almana Hospitals Group *2025 - Present*
Saudi Arabia

- Desktop application development using .NET with advanced query optimization
- Database profiling and performance analysis; issue identification, tracing, and resolution
- Web development using .NET; feature migration from desktop and Java Spring Boot applications
- Developed Hospital Information System (HIS), Contract Management system, Identity Access Management (IAM), Medical Electronic Records (EMR), and Sick Leave management system
- Built .NET integrations with ZATCA e-invoicing, Elm's Yakeen identity verification service, and the Infobip SMS gateway
- Key achievement: improved system performance by 40% through query optimization

Tech Stack: .NET, Java Spring Boot, SQL Server, Entity Framework Core, JWT Authentication, Query Optimization, ZATCA E-Invoicing, Elm Yakeen API, Infobip SMS API

AI & Full Stack Developer (Freelance / Side Projects) *2025 - Present*
Saudi Arabia

- Built VoiceOfJobs: an AI-powered recruitment and marketplace platform with 50+ capabilities
- Developed SQL Deployment Manager for automated database deployment workflows
- Created Invoice Builder Module with drag-and-drop interface and PDF export
- Built CV Creator/Generator platform with ATS-optimized output
- Developed a data scraper for the Mourjan marketplace
- Created a Text Difference Checker for document comparison
- Built Dynamic Excel data import and filtering tools
- Developed an advanced PDF report workflow engine combining data engineering with design
- Key achievements: integrated 12 AI providers with automatic failover in VoiceOfJobs; built automated job scraping from LinkedIn, Indeed, Bayt, and Mourjan; developed an email campaign system with Gmail OAuth2, tracking, and analytics; created bilingual Arabic/English interfaces with role-based access control

Tech Stack: ASP.NET Core 8, React 19, Vite, TailwindCSS, SqlSugar ORM, Playwright, HtmlAgilityPack, MailKit, Gmail API, SQLite, SQL Server, JWT Authentication, Serilog, OpenAI-compatible APIs, PDF Generation

SELECTED PROJECTS

Hospital Information System (HIS) — *Full Stack Developer*
Comprehensive HIS for managing patient data, appointments, medical records, and hospital operations across desktop and web interfaces.

Tech Stack: .NET, SQL Server, Entity Framework Core, Advanced Query Optimization

Contract Management System — *Full Stack Developer*
Contract repository, workflow automation, and reporting dashboard for Almana Hospitals Group.

Tech Stack: .NET, SQL Server, Entity Framework Core

Identity Access Management (IAM) — *Full Stack Developer*
RBAC, SSO integration, user management, and audit logging across hospital systems.
Tech Stack: .NET, SQL Server, JWT Authentication, Entity Framework Core

Medical Electronic Records (EMR) — *Full Stack Developer*
EMR data model, clinical document management, and performance-optimized reporting for large medical datasets.
Tech Stack: .NET, SQL Server, Entity Framework Core, Advanced Query Optimization

ZATCA E-Invoicing Integration — *Full Stack Developer*
Integrated hospital billing with ZATCA (Fatoora) for Saudi e-invoicing compliance, built in .NET.
Tech Stack: .NET, C#, SQL Server, ZATCA E-Invoicing APIs

Yakeen Identity Verification Integration (Elm) — *Full Stack Developer*
Integrated Elm's Yakeen service to verify national ID and Iqama details, built in .NET.
Tech Stack: .NET, C#, SQL Server, Elm Yakeen API

Infobip SMS Integration — *Full Stack Developer*
Integrated the Infobip SMS gateway for automated notifications and messaging, built in .NET.
Tech Stack: .NET, C#, SQL Server, Infobip SMS API

Enterprise Microservices Platform — CRM Suite — *Senior Microservices Developer & Architect*
Multi-module platform (CRM, Attendance, Compliance, Talent Acquisition, Loss Intelligence, Performance Management, Saned Services) with API Gateway and Redis caching.
Tech Stack: .NET Core, Docker, RabbitMQ, gRPC, API Gateway, Redis, Entity Framework Core, JWT, Swagger/OpenAPI

E-commerce Platform — *Full Stack Developer*
Full stack e-commerce platform.
Tech Stack: Angular, .NET Core, SQL Server

MAUI Blazor Water Application — *Full Stack Developer*
Water management system hosted on Azure Cloud.
Tech Stack: MAUI Blazor, .NET API, Azure Cloud

VoiceOfJobs — AI-Powered Recruitment & Marketplace Platform — *Full Stack Developer & Architect*
Full stack AI-powered recruitment and marketplace platform with 50+ capabilities for the Middle Eastern job market: automated job scraping from LinkedIn/Indeed/Bayt/Mourjan, AI-generated cover letters, an email campaign system with Gmail OAuth2, CV parsing with ATS optimization, and a multi-category marketplace (jobs, vehicles, freelance, classifieds). Supports 12 AI providers with automatic failover and a full Arabic/English bilingual interface.
Tech Stack: ASP.NET Core 8, React 19, Vite, TailwindCSS 4, Recharts, SqlSugar ORM, JWT Authentication, Serilog, Playwright, HtmlAgilityPack, MailKit, Gmail API, SQLite, SQL Server, OpenAI-compatible APIs

SQL Deployment Manager — *Full Stack Developer*
Database deployment management tool with server connection management, smart script parsing with dangerous-statement detection, multi-server execution with history tracking, and database object comparison.
Tech Stack: .NET, C#, SQL Server, Database Automation, PowerShell

Invoice Builder Module with PDF Export — *Full Stack Developer*
Drag-and-drop invoice builder with automated calculations for totals/taxes/discounts, professional PDF export, and customizable templates for brand identity.
Tech Stack: .NET, PDF Generation, Vue.js

Data Scraper for Mourjan — *Full Stack Developer*
Web scraping tool for extracting and processing listings data from the Mourjan marketplace into structured output.
Tech Stack: .NET, Playwright, HtmlAgilityPack, Web Scraping

CV Creator/Generator Platform — *Full Stack Developer*
Form-based CV creation platform with automatic professional formatting and ATS-optimized PDF/DOCX export across multiple templates.
Tech Stack: .NET, Vue.js, PDF Generation, SQL Server

Text Difference Checker — *Full Stack Developer*
Text comparison tool highlighting additions, deletions, and modifications between document versions, for code review, legal, and content-tracking use cases.

Tech Stack: .NET, Vue.js, Diff Algorithm

Dynamic Excel Data Import & Filtering Tool — *Full Stack Developer*
Dynamically imports data into Excel from external sources with intelligent column management, plus dynamic database filtering for user-driven reports without SQL knowledge.

Tech Stack: .NET, SQL Server, Excel Automation, Dynamic Filtering

Advanced PDF Report Workflow Engine — *Full Stack Developer*
Workflow combining data engineering with professional design for automated, dynamic PDF report generation from database-driven data sources.

Tech Stack: .NET, SQL Server, PDF Generation, Data Engineering

TECHNICAL SKILLS

AI & Machine Learning: AI Multi-Provider Integration

Backend: .NET Full Stack, Web API, .NET MVC, ASP.NET Core 8, Node.js, SQL Server, PostgreSQL, MongoDB, SQLite, Identity, API Gateway, Nginx, Java Spring Boot, Apache Kafka, Spring Data JPA, Spring Security, Message Queue Processing, Web Scraping (Playwright & HtmlAgilityPack), SqlSugar ORM, MailKit & Gmail API, PDF Generation & Export, Serilog Logging, JWT Authentication, OAuth2 Integration, Redis Cache, ZATCA E-Invoicing Integration, Elm Yakeen Integration, Infobip SMS API

Frontend: jQuery & JavaScript, Vue.js, Blazor, Angular, React, TailwindCSS, Vite, Recharts, Next.js

Mobile: Flutter, MAUI

Database: SQL Server & Oracle, Database Performance Optimization, Query Optimization, Database Profiling & Analysis, SQLite

DevOps: Docker, GitHub Actions, SQL Deployment & Migration Tools

Architecture: Microservices Architecture, System Architecture Analysis, Spring Boot Microservices

Domain: Healthcare IT Systems

Tools: Dynamic Excel Data Processing

PROFESSIONAL & SOFT SKILLS

Professional: Problem Solving, Critical Thinking, Adaptability, Strong Work Ethic, Handling Pressure, Teamwork, Attention to Detail, Time Management, Effective Communication, Analytical Skills, Creativity, Continuous Learning, Customer Focus, Project Management, Technical Documentation, Debugging Skills, Version Control, Performance Optimization, System Architecture Design, Issue Resolution & Troubleshooting, Advanced Problem Analysis, Legacy System Modernization, Technical Mentoring, Database Administration, Code Quality Assurance, Process Improvement, Requirement Analysis, Web Scraping & Data Extraction, AI Integration & Multi-Provider Management, Email Campaign Management & Automation, Dynamic Report Generation, PDF Document Generation & Export, Localization & Internationalization (i18n), Recruitment Platform Development, Marketplace Development, Database Deployment Automation, Invoice & Billing Systems, Text Comparison & Diff Analysis, CV/Resume Parsing & ATS Optimization, Dynamic Database Filtering & Dashboards, Data Engineering & Reporting Workflows, OAuth2 Integration, Social Media Marketing & Management, Multi-Database Architecture

Soft Skills: Problem Solving, Critical Thinking, Teamwork, Self-Motivation, Innovation & Entrepreneurship, Product Design & UX Thinking, Cross-functional Collaboration, User Experience Focus, Rapid Prototyping, Multi-Platform Development, AI-Driven Solution Design, Bilingual Communication (Arabic/English)

EDUCATION

Bachelor of Science, Cyber Security — National University
2019 - 2023 | Final Grade: 80.5

Diploma, Programming & Smartphone Maintenance — General Telecommunication Institute
2020 - 2021 | Completed Level 3A & 3B, FIL Institute

Secondary School — Safer Private School
2018 - 2019 | Final Grade: 80.13

CERTIFICATIONS

- Programming & Smartphone Maintenance — General Telecommunication Institute (Issued 06/2020, valid through Jun 2026)
- Level 3A & 3B — FIL Institute (Issued 06/2020, valid through Jun 2026)
- Datatrans Company Certificate (Issued 09/2023)
- Voluntarily Identifying a Security Gap in a Critical Application — Almana Hospitals (Issued Jun 2026, valid through Jun 2036)
- GenAI for .NET: Build LLM Apps with OpenAI and Ollama — Udemy (Issued Jun 2026, Credential ID UC-51f9609e-ef3c-4bbc-ab10-8ceb7b89493b)

LANGUAGES

Arabic (Native) | English (Fluent)
